News coverage per day

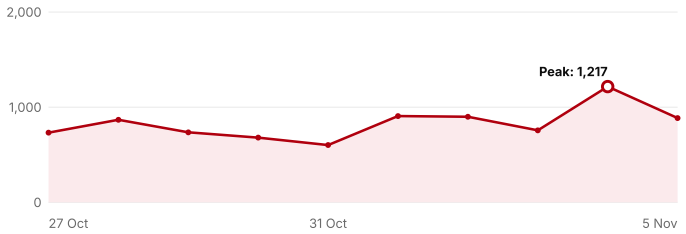

How many news articles worldwide mentioned the country each day. Spikes usually mean a big event.

BRAZIL

Busiest day: **28 Oct** with 5,213 articles, 3.4× the quietest day (2 Nov, 1,515). Average: 2,682 a day.

PORTUGAL

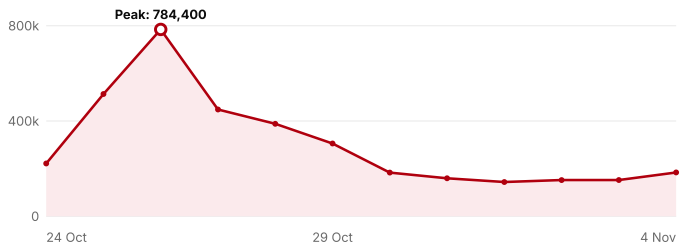

Busiest day: **4 Nov** with 1,217 articles, 2.0× the quietest day (31 Oct, 603). Average: 829 a day.

Wikipedia attention per day

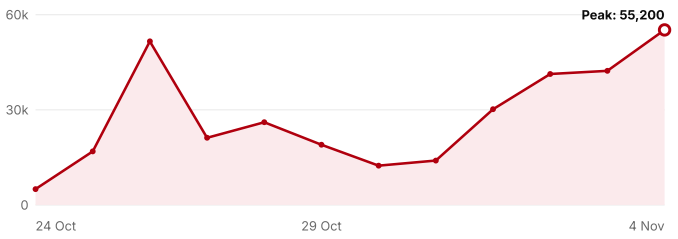

Total views of the 30 most-read pages each day. It shows how busy people were looking things up.

BRAZIL

The #1 page, **Luiz Inácio Lula da Silva**, had 400,600 views: 11% of all top-30 views in the period.

PORTUGAL

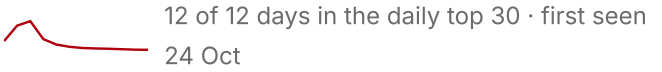

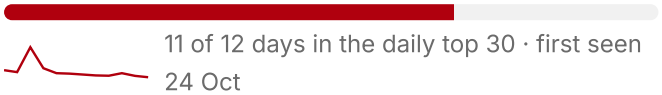

The #1 page, **Paulo Fonseca**, had 61,200 views: 18% of all top-30 views in the period.

Most-read on Wikipedia

Total views over the period. The small line shows that page's views day by day.

How to read the numbers

Views

Times a Wikipedia page was opened from that country. Wikimedia rounds them up a little to protect privacy.

Days in the top 30

On how many recorded days the page was among the country's 30 most-read. More days means lasting interest, not a one-day spike.

News articles

Online news articles worldwide that mention the country, counted by The GDELT Project. One article can count for two countries.

Cooperation and conflict

GDELT sorts every news event into 20 types, from statements and talks (cooperation) to protests and fighting (conflict).

Period

Like Polling began recording on 24 October 2026. Each report covers up to the last 30 recorded days, so early reports cover fewer days.

Sources and limits

Built by Like Polling from its own daily records of open data. Wikipedia page views: Wikimedia Foundation (wikimedia.org), per country, rounded up by Wikimedia for privacy. News topics and countries: The GDELT Project (gdeltproject.org), counted from worldwide online news. Ideas are written by AI (Google Gemini) and can contain mistakes. YouTube and news headlines are not part of the report; see them free on likepolling.com.
